60 Beginner-Friendly Questions (Arrays, Strings, Digits)

Digit Problems (15 Questions)

1 Reverse a number
2 Check if a number is palindrome
3 Count digits in a number
4 Sum of digits
5 Product of digits
6 Check Armstrong number
7 Check Perfect number
8 Find GCD of two numbers
9 Find LCM of two numbers
10 Count even and odd digits in a number
11 Find largest digit in a number
12 Find smallest digit in a number
13 Print digits of a number in reverse order
14 Convert decimal to binary (without library)
15 Convert binary to decimal

String Problems (20 Questions)

1 Reverse a string
2 Check palindrome string
3 Count vowels and consonants
4 Convert to uppercase without using library
5 Convert to lowercase without using library
6 Remove spaces from a string
7 Remove vowels from a string
8 Count words in a string (split by space manually)
9 Replace all spaces with '-'
10 Find frequency of a character (without HashMap)
11 Find first non-repeating character (using loops)
12 Check anagram (sort and compare arrays of chars)
13 Check if string is rotation of another
14 Find substring manually (without substring())
15 Check if two strings are equal (without equals())
16 Remove duplicate characters (using new string building)
17 Count digits in a string
18 Reverse words in a sentence (using only char array)
19 Check if string contains only digits
20 Find longest word in a sentence

Array Problems (25 Questions)

1 Find max element in array
2 Find min element in array
3 Sum of array elements
4 Average of array elements

5 Reverse an array
6 Copy one array to another
7 Merge two arrays into one
8 Find second largest element
9 Find second smallest element
10 Sort array in ascending order (without library)
11 Sort array in descending order
12 Remove duplicates from array (by shifting elements)
13 Find frequency of each element (nested loops)
14 Find missing number in sequence 1..n
15 Count even and odd elements
16 Count positive and negative elements
17 Count prime numbers in array
18 Left rotate array by 1 position
19 Right rotate array by 1 position
20 Left rotate array by k positions (using reverse method)
21 Right rotate array by k positions
22 Insert element at a specific position
23 Delete element from a specific position
24 Find intersection of two arrays (nested loops only)
25 Find union of two arrays (without HashSet, using new array)
